

Bring them Back to Work Safely.

HEALTH-BASED SAFETY +
SECURITY

KEY ISSUES

1

Our people are worried about returning to the facility or office space.

2

We're worried about inadvertently facilitating spread of COVID-19 among our employee population.

3

We need both guidance and tools to provide assurance and protection to allow our personnel to be productive and feel secure.

COVID-19

WHAT WE KNOW SO FAR

1

Elevated body temperature is an indicator of this and other illnesses.

2

COVID-19 does have a lifespan on a variety of surface types.

3

Hand-to-hand contact could be a means of transmission from person-to-person.

Health-Based Safety + Security

Solutions from Alen

HEALTH-BASED SAFETY + SECURITY:

THERMAL CAMERA SYSTEMS

Establish a front line of defense for your facility.

“CONTACTLESS” DOOR OPENERS

Minimize disease spread through indirect contact.

ANTIMICROBIAL DOOR & SECURITY HARDWARE

Stifle the spread of microorganisms.

THERMAL CAMERA SYSTEMS

Your Front Line of Health-Based Defense.

- “Contactless” to maintain social distancing.
- Accuracy +/- .9 Degrees Fahrenheit or better.
- Thermal Scan for Pass/Fail.
- Processes a temperature check, with audible alert sounds in less than 3 seconds.
- Configurable to deny entry to anyone who fails.
- Subscription based remote management software to allow for email and text notifications.
- Can be integrated into an access/deny control system.
- In-house HR Consultant available for guidance on policy and implementation procedure.

THERMAL

Camera Systems

TURNKEY SOLUTION

- Specification
- Installation
- Training
- Service and Calibration
- Implementation in 3-4 weeks

“No-Touch” Tech

**Automatic Door Openers
for the New “Clean” Office.**

- Restrooms. Certain Doors that have to be closed for fire reasons. You can walk through, wave a hand and the door opens.
- Can be integrated into a card access system.
- Just wave your hand or arm. Motion activated. Microwave technology.
- Electromechanical opening; more cost-effective than mechanical solutions.
- Rapid implementation.
- Supported with quarterly calibration and maintenance.

“Contactless” DOOR OPENERS

“Contactless” ACCESS CONTROLS

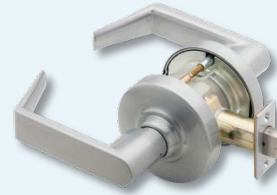

Replacing existing access keypads with “no-touch” phone-based Bluetooth® technology.

ANTIMICROBIAL

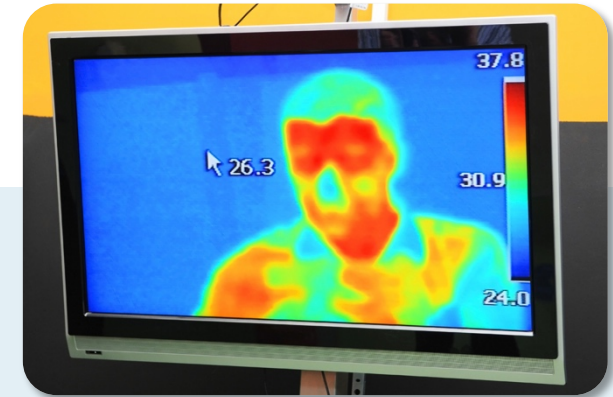

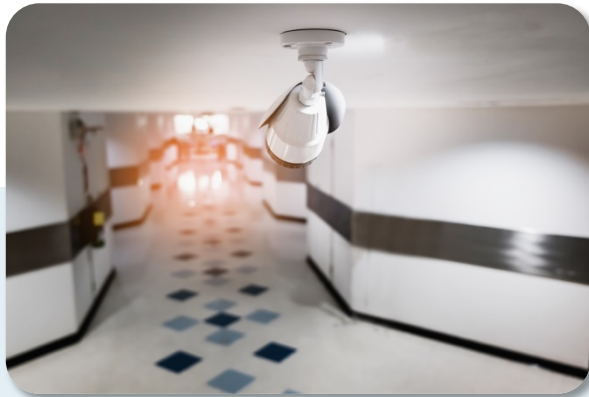

Door and Security Hardware

- Ionic Silver (AG+) coating.
- Special formulation inhibits the bacteria and mold on high-touch surfaces.
- A wide range of styles, functions and finishes.
- Ideally suited for: healthcare, government, education, corporate and foodservice.

Alen Security
